

CONVEYOR SECTION

SEE OVER FOR SPECIFICATIONS

Textor Conveyor Sections incorporate a stiffened top flange for rigid mounting of conveyor idlers and a shorter lower flange to reduce dust build up. This light weight structural member is produced in high tensile galvanised steel for superior structural performance. When combined with Textor Channel and Angle, Textor Conveyor Sections offer a ready-made solution for conveyor module construction. Customisations are available upon request.

Features:

- Manufactured from high tensile galvanised steel
- Superior strength
- Corrosion resistant
- Operational excellence

Finishes:

- Galvanised Steel

Customisations:

- Cut to length
- Grade and gauge
- Custom roll form and modified profiles
- Punching

Availability:

- Rolled to order
- Minimum quantity required

Support Material Available:

- CAD Drawings
- Textor Product Specifications Brochure

Example Applications:

- Conveyor modules

ORDER TODAY OR FOR MORE INFORMATION:
